

Primatint Dyes

Liquid dyes for water and solvent based wood stains

Primatint liquid dyestuffs are dyestuff solutions (liquid dyestuffs) with good fastness properties. They contain metal complex dyes in a solvent mixture. The dye solutions are manufactured "in-situ" through a specially developed chemical process and not by simply dissolving powder dyes in solvents. This gives Primatin dyes a very long shelf-life and stability. After application and once dry, Primatint liquid dyes have very good overcoating fastness.

Advantages:

Bright intensive shades on Wood

Good Light-Fastness

Ready to use solutions making mixing and application very easy

Soluble in both Organic Solvents and Water, providing flexibility while manufacturing wood stains for both solvent based and water based applications

All dyes in this range are miscible with each other which enables colour matching

Dye Characteristics:

Free from banned/ harmful solvents, free from heavy metals

Dyes manufactured "in-situ" in a solvent combination giving them a very good storage stability

The exact solvent composition has been optimized for each dyestuff

Shelf-life is minimum 5 years

Application:

Primatint Dyes are miscible with both Water and Solvents. However, it is recommended that dilute dye solutions are prepared by first diluting with appropriate solvents and then by using only demineralized Water

Primatint Series	pH	Lightfastness	Water based	NC based
YELLOW G LIQUID	8 - 8.5	6 - 7	5	4 - 5
YELLOW R LIQUID	8 - 8.5	6 - 7	5	4 - 5
ORANGE LIQUID	8 - 8.5	6	5	4 - 5
CHERRY RED LIQUID	8 - 8.5	6 - 7	5	4 - 5
RUBINE LIQUID	8 - 8.5	6	5	4 - 5
LIGHT BROWN LIQUID	8 - 8.5	6 - 7	5	4 - 5
RED BROWN LIQUID	8 - 8.5	6 - 7	5	4 - 5
BROWN LIQUID	8 - 8.5	6 - 7	5	4 - 5
DARK BROWN LIQUID	8 - 8.5	7	5	4 - 5
ROYAL BLUE LIQUID	8 - 8.5	7	5	4 - 5
BRILLIANT BLUE LIQUID	8 - 8.5	6	5	4 - 5
BLACK LIQUID	8 - 8.5	7	5	4 - 5
